

Kaleem Qasim

PHP Developer

(+92) 3017720400 – Lahore, Pakistan

github.com/kaleemqasim | linkedin.com/kaleem-qasim

SUMMARY OF QUALIFICATIONS

- Full Stack PHP Developer with **6+ years of experience** in developing scalable web applications and optimizing system performance.
- Proficient in **PHP, JavaScript, Laravel, MySQL**, and modern front-end frameworks.
- Strong expertise in **API development, database management**, and writing clean, maintainable code.
- Passionate about **problem-solving, continuous learning**, and collaborating with cross-functional teams.
- Dedicated to delivering **efficient, high-performing solutions** with best practices in software development.

EDUCATION

Khwaja Fareed University of Engineering and IT (KFUEIT)

Bachelor of Science in Computer Science

Rahim Yar Khan, PK

Feb 2019

- Major GPA: 3.14/4.00

TECHNICAL SKILLS

- **Backend:** PHP (Laravel), RESTful APIs, WebSockets
- **Frontend:** HTML, CSS, Bootstrap, JavaScript, ReactJS, Redux
- **Database:** MySQL, Redis
- **Testing & Debugging:** PHPUnit, Postman
- **Software/Other:** OpenAI, Zapier, Docker, Agile/Scrum, Git, Stripe, VPS, Digital Ocean, Jira, Trello

RELATED EXPERIENCE

Foxtek Systems LTD

Technical Lead - PHP

Lahore, PK

Sep 2022 – Present

- Led a team of **5 developers** in building scalable **PHP/Laravel** applications, improving project delivery speed by **30%**.
- Designed and optimized **multi-tenant SaaS database structures** for scalability and performance.
- Integrated **WebSockets, RESTful APIs**, and third-party services such as **QuickBooks and Microsoft Dynamics**.
- Implemented **caching strategies, indexing, and query optimizations** to enhance application efficiency.
- Managed **project timelines**, proactively addressing challenges to ensure on-time, high-quality deliverables.
- Refactored **legacy PHP codebases**, reducing **technical debt** and improving maintainability.

Devsinc

Software Engineer

Lahore, PK

Dec 2021 – Sep 2022

- Developed and maintained **scalable, high-performance applications** using **PHP/Laravel** for backend and **ReactJS/NextJS** for frontend.
- Designed and implemented **RESTful APIs** and backend services to support dynamic frontend applications.

- Collaborated with **cross-functional teams**, including designers and product managers, to deliver feature-rich applications.
- Followed **strong software development principles**, including **SOLID, DRY, and MVC architecture**, to ensure maintainable and scalable codebases.
- Worked on **authentication, authorization, and role-based access control** for secure applications.
- Optimized **database queries and improved application performance** by implementing caching strategies, indexing, and query optimizations.
- Integrated **third-party services**, including **payment gateways, social logins, and external APIs**, to extend application functionality.

Digimark Developers

Software Engineer

Lahore, PK
Mar 2021 – Dec 2021

- Developed and maintained **Laravel/VueJS and ReactJS** applications across multiple domains.
- Built and optimized **Google Chrome extensions** to enhance browser functionality.
- Designed and implemented **scalable backend architectures**, integrating **WebSockets for real-time features** and **cron jobs for scheduled tasks**.
- Refactored **codebases** to improve performance, maintainability, and scalability.
- Built and optimized **databases, applications, and servers** to support backend functionality.

Enigmatix LTD

Software Engineer

Bahawalpur, PK
Oct 2019 – Feb 2021

- Developed **user-friendly web applications**, enhancing user engagement and satisfaction.
- Created **reusable components** using **Laravel**, accelerating development workflows.
- Designed **efficient APIs** and collaborated with backend developers to ensure seamless integrations.
- Refactored **codebases** to improve performance, maintainability, and scalability.
- Collaborated with teams to **implement best coding practices** and optimize system workflows.

TylexTech (Internship)

Python Django Internee

Lahore, PK
Jan 2018 – Apr 2018

- Assisted in the development of **Django-based web applications**, ensuring adherence to project requirements.
- Worked closely with **UX/UI designers** to implement visually appealing and functional interfaces.
- Researched and explored **emerging technologies** for potential integration into ongoing projects.
- Utilized **Git for version control**, facilitating smooth collaboration among team members.

PROJECT EXPERIENCE

LinenTech.net

Foxtex Systems LTD

Lahore, PK
Sep 2022 – Current

LinenTech is a **multi-tenant laundry management system** designed for scalability and efficiency. Built with **PHP Laravel**, it supports **database-per-tenant**, ensuring secure data isolation. Seamless integration with **Datamars, QuickBooks, Xero, Square, Stripe, and Microsoft Dynamics** streamlines financial and inventory management.

Key Technologies & Features:

- **RFID/Barcode integration** for tracking thousands of linens efficiently as they move in and out of the laundry.
- **WebSockets** for real-time updates.
- **Cron jobs** for process automation.
- **React.js frontend** for a responsive user experience.
- **Cross-platform mobile apps** for on-the-go access.
- **Stripe and Square payment integrations** for seamless transactions.
- **Role-Based Access Control (RBAC)** for secure multi-user management.

It is successfully live and used by over 200 laundries in the **USA, Europe, and China**.

MapleHR.io

Devsinc

Lahore, PK

Jan 2022 – Sep 2022

MapleHR is a **comprehensive HR management system** designed to streamline workforce operations. It features:

- **Multi-tenancy** with module-based configurations according to tenant subscriptions.
- **Employee management** with role-based access.
- **Project management** with a Kanban board.
- **Ticketing and coupon management** for streamlined processes.
- **Automated offboarding** to enhance HR efficiency.
- **Departments, Tickets, Leaves, Claims, Inventory, Reports, Feedback, and People Management** modules for complete workforce administration.

Serving as an all-in-one solution, MapleHR simplifies **employee lifecycle management** while improving company operations. It is live and actively used by multiple firms in Pakistan.

ProCopy.ai

Personal

Lahore, PK

Feb 2023 – Apr 2023

ProCopy.ai is an AI-powered content generation and productivity tool designed for content creators, students, marketers, and professionals. The platform allows users to interact with an **OpenAI-based** chatbot to perform a variety of intelligent tasks such as:

- Summarizing long texts
- Generating images from prompts
- Writing complete books and exporting them as PDF
- Checking content for plagiarism
- Providing writing assistance for blogs, articles, essays, and emails

Users can test the chatbot with a **free token-based trial**, and after exceeding the limit, they can **subscribe to paid plans** using integrated payment gateways like Stripe and Paddle.

Midfeed is a **B2B and B2S Laravel application** that extends beyond traditional buying and selling platforms. It features **book-keeping, dynamic calendar event tracking, inventory management, and campaign management**. A Chrome extension enables users to send campaigns directly to Skype accounts or emails.

Key Technologies & Features:

- **WebSockets** for real-time updates.
- **Cron jobs** for process automation.
- **Seamless integration with third-party services** for efficient business operations.

Lighting Stores is a **feature-rich e-commerce platform** built with **Laravel**, migrated from a WordPress-based system. It includes **seamless product import from WordPress CSV dumps** to retain existing data. The application integrates multiple third-party services, including:

- **Stripe** for payments.
- **SendGrid for emails**
- **Twilio for SMS notifications.**
- **AWS S3** for scalable storage solutions.

Boatek is a **boat booking application** designed with **PHP Laravel** for secure boat owner registration, boat listings, and real-time booking management.

- **Boat owners** can register and manage multiple boats with different timings and pricing.
- Users can register and book boats for specific times, with availability displayed in a **real-time calendar**.
- Users send **booking offers** to boat owners, who can accept or decline.
- Once an offer is accepted, users make payments via **Payfort by Amazon**.
- **Automated push notifications** for booking updates, and payment updates.

The application is developed for **both Android and iOS**, ensuring a secure and seamless user experience. The app is **live and operational in Saudi Arabia**.
