

# MOHAMMAD KALEEM

TECHNICAL LEAD | PHP & AI ENGINEER

kaleemullahlqp@gmail.com | (92) 301-7720400 | Lahore, 54782, Pakistan | linkedin.com/in/kaleem-qasim

## PROFESSIONAL SUMMARY

Results-driven Full Stack PHP and AI Engineer with 7 years of experience building scalable web applications and production-grade AI systems, including autonomous agents and Retrieval-Augmented Generation (RAG) pipelines powered by the Anthropic API and FastAPI. Skilled in Laravel, MySQL, and React/Next.js, with a proven track record of optimizing system performance, leading engineering teams, and shipping AI-driven features that improve response accuracy and reduce operational overhead. Combines deep backend expertise with hands-on AI orchestration to deliver intelligent, efficient, and maintainable software.

## WORK EXPERIENCE

### Technical Lead (PHP) - Remote

Nextek Systems LTD — Atlanta, GA, United States *Oct 2022 – Present*

- Architected and deployed autonomous AI agents and intelligent chatbots utilizing the Anthropic API and FastAPI with dynamic tool use and function calling, automating responses to over 70% of routine customer queries with real-time product data.
- Designed and optimized a Retrieval-Augmented Generation (RAG) system using vector-based semantic search, improving response accuracy for knowledge-base queries and cutting average query resolution time by over 30%.
- Led full-stack development and architecture of scalable multi-tenant web applications using PHP, Laravel, MySQL, and React.js, supporting 10,000+ active users across multiple client deployments.
- Spearheaded system performance tuning and database optimization, reducing average query response times by up to 40% and maintaining 99.9% uptime across multi-tenant architectures.
- Mentored a team of 5+ engineers, establishing code review standards and clean code practices that reduced production bugs by 25% and accelerated onboarding for new hires.

### Sr. Software Engineer - Remote

Devsinc — San Jose, CA, United States *Mar 2021 – Oct 2022*

- Engineered and maintained high-performance applications using PHP/Laravel and React.js/Next.js, serving 5,000+ daily active users with 99.5% uptime.
- Designed secure RESTful APIs and backend services with robust authentication, authorization, and role-based access control (RBAC), supporting 15+ integrated client modules.
- Optimized database performance and scalability through advanced indexing, query optimization, and caching, reducing average page load times by 35%.
- Integrated 10+ third-party services, including payment gateways, social authentication providers, and external APIs, to extend core application features.
- Developed real-time capabilities and automation utilizing WebSockets for live features and cron jobs for scheduled background tasks.
- Built and optimized Google Chrome extensions to enhance browser functionality and streamline user workflows.
- Championed clean code practices, refactoring legacy systems according to SOLID, DRY, and MVC principles to minimize technical debt.

### Software Engineer - On-site

Enigmatix LTD — Bahawalpur, PB, Pakistan *Oct 2019 – Feb 2021*

- Developed user-focused web applications, creating modular, reusable Laravel components that cut feature development time by 20% across the team.
- Designed and implemented efficient APIs, collaborating closely across frontend and backend teams to ensure seamless data integration.
- Refactored legacy codebases to eliminate technical debt, improving application performance by 25% and laying the groundwork for horizontal scalability.

- Assisted in building Python/Django web applications, ensuring strict adherence to technical requirements and project specifications.
- Collaborated on team workflows to implement development best practices, enforce clean code standards, and optimize internal processes.

## EDUCATION

---

### Bachelors Degree (Computer Science)

Khwaja Fareed University of Engineering and Information Technology — Rahim Yar Khan, PB, Pakistan 2019

## CORE SKILLS & COMPETENCIES

---

- Full Stack Development: PHP, Laravel, JavaScript
- Frontend Frameworks: React.js/Next.js
- AI Engineering: FastAPI, Python, Anthropic API
- Intelligent Systems: RAG Search, AI Agents, Tool Use
- Database Management: MySQL, Redis
- System Architecture: Multi-Tenant SaaS, RESTful APIs
- Infrastructure & DevOps: Docker, Linux, Nginx, Apache
- Technical Leadership: Team Mentoring, Code Reviews

## ADDITIONAL INFORMATION
